

CARRIER MANUAL TRAFFIC DOCUMENT ACCEPTANCE CHART

The Carrier Manual Traffic Document Acceptance Chart is provided below to denote a carrier's acceptance of manual traffic documents currently distributed through ARC. In addition, this chart will identify any restrictions a carrier has regarding issuance and acceptance of manual documents. The manual traffic document issuance and acceptance policies of individual carriers are subject to change.

Agents should refer to the following chart to ensure that the ticketing carrier's instructions with respect to Manual Traffic Document Acceptance have been satisfied. Although ARC will continue to process all sales reported by an accredited agent, failure to issue a traffic document in accordance with the policy of the individual ticketing carrier may result in action being taken by that carrier (e.g. penalty being assessed) or may adversely affect the ticketing carrier's ability to render efficient service to its passengers.

Manual Tour Orders are no longer distributed and became obsolete effective 1/09/05. Manual Miscellaneous Charge Orders (MCOs) are no longer distributed and became obsolete effective 10/17/05.

Yes indicates the carrier accepts the manual document, No indicates the carrier does not accept the manual document and * indicates the carrier has not provided the information.
